How can we find frequent item sets using candidate generation? Discuss the Apriori algorithm with example. How can we further improve the efficiency of Apriori based mining? Justify your answer with respect to hash-based technique and vertical data format. There are 4 transactions in the database given below. Illustrate the Apriori algorithm to find the frequent item sets from the given database. Given the minimum support threshold is 50%.

j) Q2 a) b) c) d) 10(e) f)	Define break-even point. Define work study and method study. Part-II Only Focused-Short Answer Type Questions- (Answer Any Eight out of Twelve) 102 102 102 102 102 Explain the Importance of Aggregate Planning and Capacity Planning. List the Difference between them. What are the assumptions of the basic EOQ Model? Distinguish between a Fixed order- quantity system and fixed-time-period system. Write basic issues and tools of managing production. Explain the strategies and guidelines of Aggregate planning. Describe the Functions of Master Production Scheduling. Describes the steps involved in product design and explain the stages of product life cycle with neat sketch. Explain in details about the type of inventory. Write down the reasons for keeping inventories. What is planning and examine the importance of planning and control in Manufacturing sector.
