Explain them with examples. g) What do you understand by Selective Repeat Sliding window protocol? Also discuss the size of sliding window at both the sender site and receiver site. h) Why we need media access control protocol? Explain and multicast? j) Explain the effect of noise of on coaxial cable and twisted pair cable? k) Draw and explain the header format of a Real Time Transport Protocol. | | | 2 nd Sem | | | | |
| Answer Question No.1 (Part-1) which is compulsory, any eight from Part-II and any two from Part-III. The figures in the right hand margin indicate marks. Part-I Answer the following questions: What is mean by data communication? What is mean by data communication? What is ARQ? Write short notes on Ethernet? What is the purpose of Domain Name System? Difference between IPv4 and IPv6? What is FTP? Part-II Only Focused-Short Answer Type Questions-(Answer Any Eight out of Twelve) What is the key idea of Stop & Wait Protocol? Explain in detail. Di What is the role of layers, protocols, interfaces and services? Explain. Cy What is framing? What are various methods used for framing? Explain them with examples. By What do you understand by Selective Repeat Sliding window protocol? Also discuss the size of sliding window at both the sender site and receiver site. Now we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Di Explain the effect of noise of on coaxial cable and twisted pair cable? Explain the effect of noise of on coaxial cable and twisted pair cable? Explain the effect of noise of on coaxial cable and twisted pair cable? Explain the effect of noise of on coaxial cable and twisted pair cable? | | | | BRANCH(S |): MCA (2 Yrs | | |
| Answer Question No.1 (Part-1) which is compulsory, any eight from Part-II and any two from Part-III. The figures in the right hand margin indicate marks. Part-I Answer the following questions: (2 × 10 a) What is mean by data communication? What is mean by data communication? What is ARQ? Write short notes on Ethernet? What is a Hub? Define LAN? Difference between IPv4 and IPv6? What is the purpose of Domain Name System? What is TELNET? What is FTP? Part-II Only Focused-Short Answer Type Questions-(Answer Any Eight out of Twelve) What is the key idea of Stop & Wait Protocol? Explain in detail. What is CSMA/CD? Why we use it? Explain in detail. Divat is the role of layers, protocols, interfaces and services? Explain. Explain ICMP and IGMP protocol used in network layer? Connection less and connection-oriented protocol What is framing? What are various methods used for framing? Explain them with examples. What do you understand by Selective Repeat Sliding window protocol? Also discuss the size of sliding window at both the sender site and receiver site. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Why we need media access control protocol? Explain ALOHA in detail. Dival is the effect of noise of on coaxial cable and twisted pair cable? Explain the effect of noise of on coaxial cable and twisted pair cable? | | 102 | 102 | | | 102 | 102 |
| The figures in the right hand margin indicate marks. Part-I Answer the following questions: (2 × 10 a) What is mean by data communication? 102 102 102 b) What are the responsibilities of data link layer? c) What is ARQ? d) Write short notes on Ethernet? e) What is a Hub? f) Define LAN? g) Difference between IPv4 and IPv6? h) What is the purpose of Domain Name System? i) What is TEINET? 102 102 102 102 102 j) What is FTP? Part-II Only Focused-Short Answer Type Questions-(Answer Any Eight out of Twelve) a) What is the key idea of Stop & Wait Protocol? Explain in detail. b) What is the key idea of Stop & Wait Protocol? Explain in detail. c) What is the role of layers, protocols, interfaces and services? Explain. d) Explain ICMP and IGMP protocol used in network layer? e) Connection less and connection-oriented protocol f) What is framing? What are various methods used for framing? Explain them with examples. g) What do you understand by Selective Repeat Sliding window protocol? Also discuss the size of sliding window at both the sender site and receiver site. h) Why we need media access control protocol? Explain ALOHA in detail. i) Why routing protocol is required? Explain flooding and multicast? j) Explain the effect of noise of on coaxial cable and twisted pair cable? k) Draw and explain the header format of a Real Time Transport Protocol. | Δn | | | | | | |
| Part-I Answer the following questions: a) 2 What is mean by data communication? b) What are the responsibilities of data link layer? c) What is ARQ? d) Write short notes on Ethernet? e) What is a Hub? f) Define LAN? g) Difference between IPv4 and IPv6? h) What is the purpose of Domain Name System? i) 2 What is TELNET? j) What is FTP? Part-II Only Focused-Short Answer Type Questions-(Answer Any Eight out of Twelve) a) What is the key idea of Stop & Wait Protocol? Explain in detail. b) What is the key idea of Stop & Wait Protocol? Explain in detail. c) 2 What is the role of layers, protocols, interfaces and services? Explain. d) Explain ICMP and IGMP protocol used in network layer? e) Connection less and connection-oriented protocol f) What is framing? What are various methods used for framing? Explain them with examples. g) What do you understand by Selective Repeat Sliding window protocol? Also discuss the size of sliding window at both the sender site and receiver site. h) Why we need media access control protocol? Explain ALOHA in detail. i) Why routing protocol is required? Explain flooding and multicast? j) Explain the effect of noise of on coaxial cable and twisted pair cable? b) Draw and explain the header format of a Real Time Transport Protocol. | | 13WCI | · | from | Part-III. | | it-ii aliu aliy two |
| Answer the following questions: a) 2 What is mean by data communication? 102 102 102 102 b) What is ARQ? d) Write short notes on Ethernet? e) What is a Hub? f) Define LAN? g) Difference between IPv4 and IPv6? h) What is the purpose of Domain Name System? i) 2 What is TELNET? 102 102 102 102 j) What is FTP?
